

During the week of October 10th from 7:00am through 5:00pm daily, we will be conducting Geotechnical site verifications for the ANSYS Simulation Building and Undergraduate Maker Center. It is anticipated that the work will take approximately one week to complete. The work will be conducted on the future site of the ANSYS building in the parking lot off of Frew Street between Porter Hall, Hamerschlag Hall and Scaife Hall. There will be temporary parking closures and intermittent construction signage posted in the area and on Hamerschlag Drive alerting both pedestrians and drivers of the work zones. The work will not restrict the existing ADA parking spaces.
