

During excavation for the ductbank, Tech St will be reduced to one travel lane with flaggers. Excavation will begin on the Highmark side of Tech street and the lane closest to Posner will remain open.

During excavation for the ductbank, Tech St will be reduced to one travel lane with flaggers. When the Highmark side of Tech St is completed it will be plated so that the travel lane can be used while the other side of the street is excavated.

Since this corner of the sidewalk will be closed, pedestrians will be detoured using the diagonal walkway leading to the front of Posner Hall and down the steps to Tech St. Vice Versa.

On January 9th, 2024, this section of Frew St will be temporarily closed for a short period of time in order to deliver and set the manhole.

While excavation is occurring on the sidewalk to prepare for the manhole placement, this corner of the sidewalk will be closed and flaggers will be maintained to assist with pedestrian traffic.
